

The Joint Simulation System (JSIMS)

Presented at Analytic Wargaming Conference, 1 Apr 97

CHAIRMAN'S JOINT VISION 2010

Simulations must be interconnected globally--creating a near-real-time interactive simulation superhighway between our forces in every theater. Each CINC must be able to tap into this global network and connect forces worldwide that would be available for theater operations.

WHY JSIMS ?

- **Improve Joint warfare functionality in training**
 - Support new missions in joint perspective
 - Improve responsiveness to training needs
 - Employ current and future C⁴I systems
- **Replicate the operational environment**
 - Represent the full mission space
 - All phases of operations
 - Natural/physical environment
- **Reduce resource requirements per event**
 - Planning
 - Execution
 - Assessment

THE JOINT TRAINING SYSTEM

THE PROCESS

Requirements

- **Derived From National Military Strategy and Assigned Missions**

Based on Commander's Intent
& Joint Doctrine/JTTP

Stated in Terms Of
Joint Mission Essential Tasks;
Conditions; and Joint Standards

Plans

- **Driven by Training Requirements, Training Audience and Tools**

Creates Joint Training Plan
And Establishes Objectives
To Meet Requirements

Guidance Provided and Schedules
Deconflicted by the CJCS

JOINT TRAINING SYSTEM

Assessments

- **Commander Assesses:**
 - Training Effectiveness
 - Joint Readiness

Identify Ability to Meet Joint Standards:
Strengths/Deficiencies in Doctrine,
Organization, Training, Materiel &
Education, & People

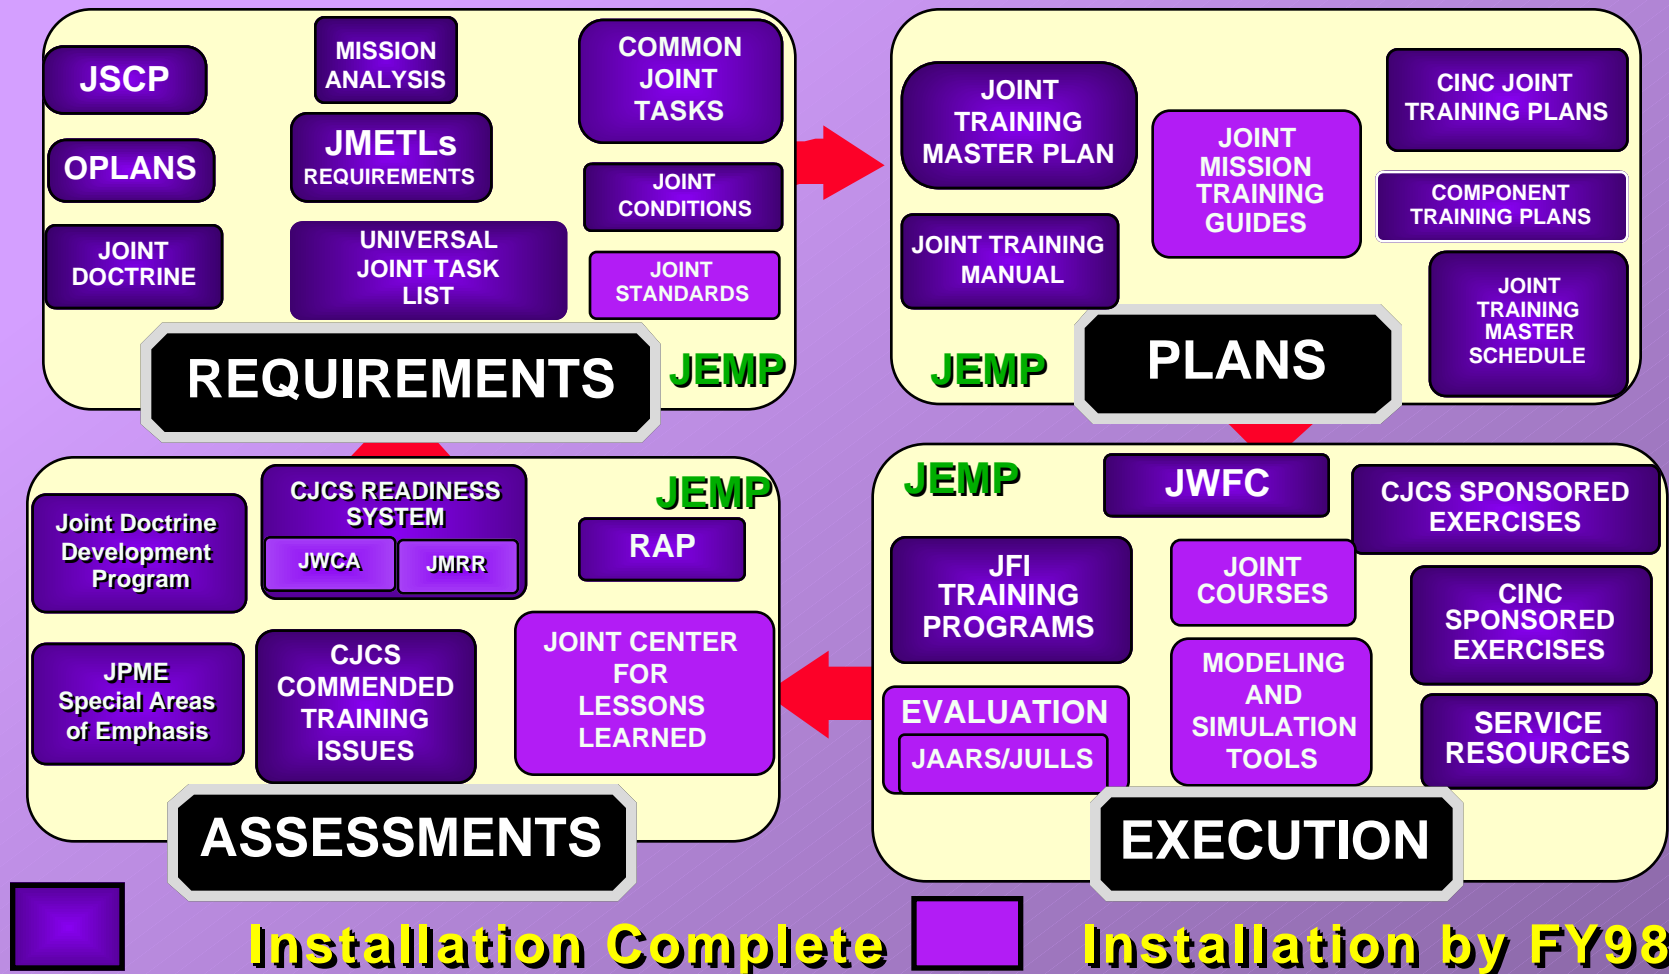

Execution

- **Joint Training Conducted by CJCS & Combatant Commands**

Commanders Evaluate Each Event
Common Tasks Addressed by USACOM
& SOCOM

THE JOINT TRAINING SYSTEM

KEY COMPONENTS

PUTTING THE SYSTEM IN PLACE BY FY98

WHAT IS JSIMS ?

- **Next Generation Simulation System**
- **Joint Synthetic Battlespace for training, educating, practicing and mission rehearsal**
- **Strategic Theater and Operational Levels at Initial Operational Capability (IOC) - 1999**
- **Mature Military Operations Other Than War (MOOTW) and force enabler capabilities at Full Operational Capability (FOC) - 2003**
- **Link into existing and future C⁴I systems**
- **Cooperative effort across DOD and other government agencies**

CHALLENGES

- Transition plan from current simulation systems
- Service versus Joint Training Requirements

JSIMS TRAINING ENVIRONMENT

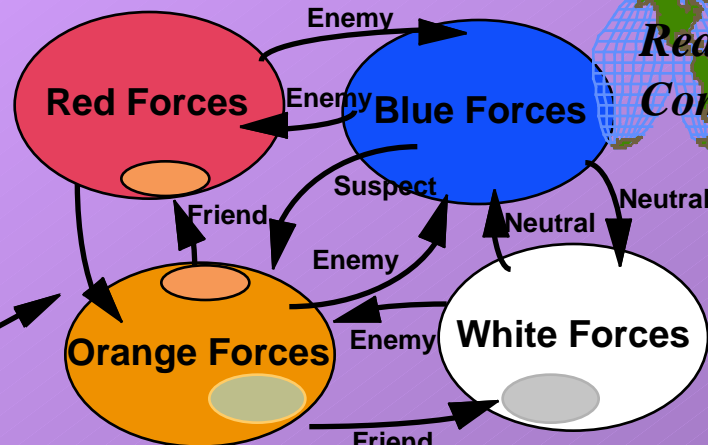

Multi-Dimensional Factions

Training Audience

Requirements

JSIMS

Real World Complexities

Factions within Forces

AAR

C4I

- **Faster Response**
- **More Flexible**
- **Simpler Support**
- **Less Expensive**

THE MODELING & SIMULATION ENVIRONMENT

“... create situations for the CDR and Staff to execute the Decision Making Process ...”

- Bring scenario to life at real time (TPFDD)
- Link to C⁴I systems - “memorex” or real
- Provide appropriate level of intelligence
 - ◆ messages / reporting
- AAR products -
 - ◆ “picto-history”
 - ◆ log of activity / decisions made
- Technology supports CAX / CINC training objectives

REQUIREMENTS PROCESS

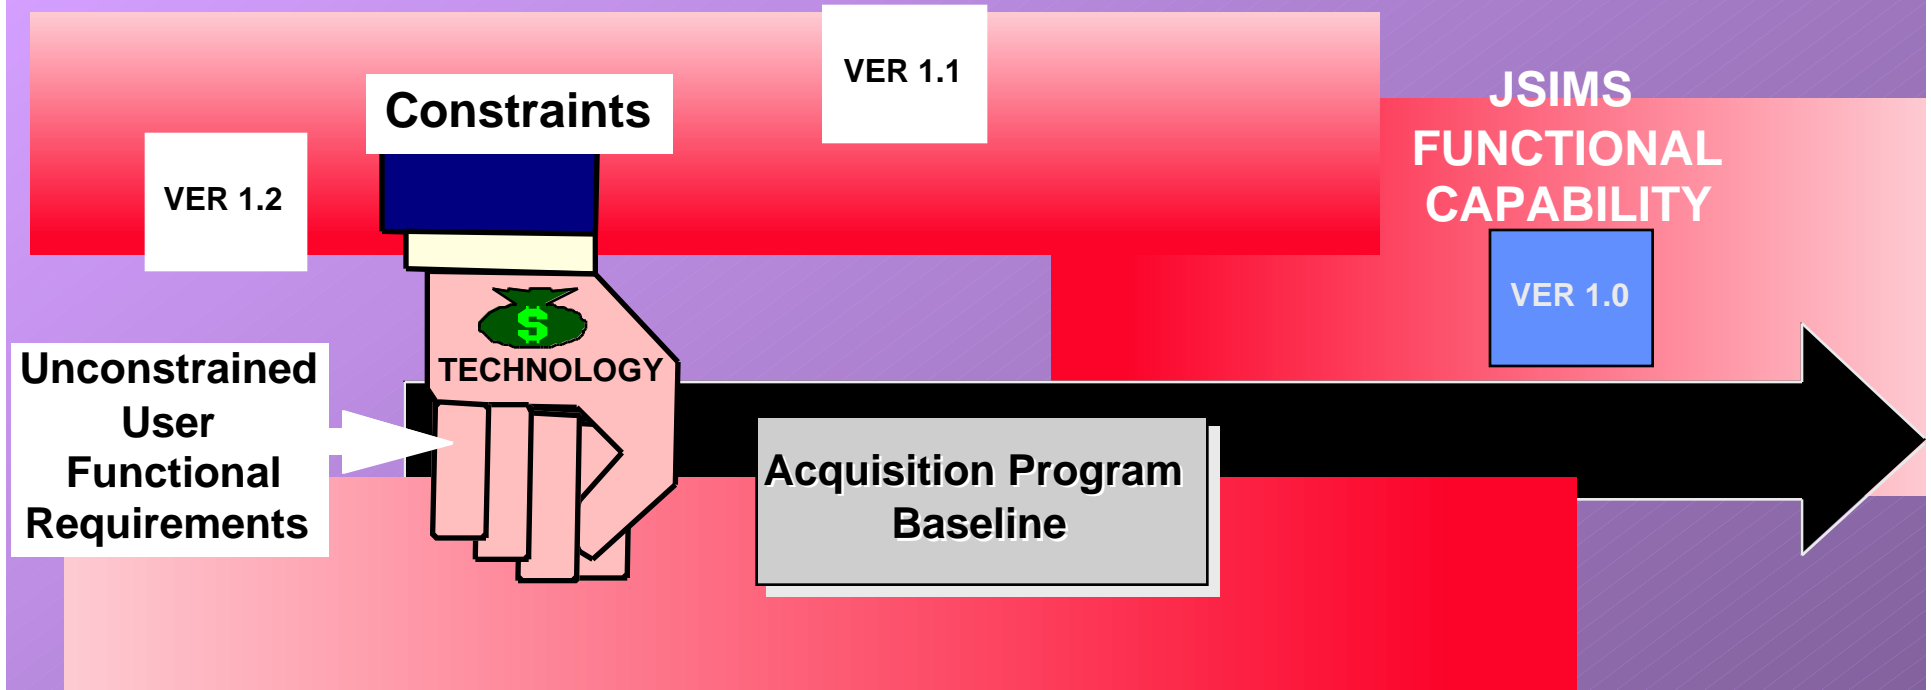

- **Combatant Commands**
 - **Universal Joint Task List (UJTL) Review**
 - **Refined Joint Mission Essential Task List (JMETL)**
 - **Joint Training Plans**
 - **USACOM's Common Task List**
 - **Scenario Development**
- **Joint Task Force (JTF)**
 - **USPACOM JTF JMETL**
 - **USACOM JTF HQ Master Training Guide**
- **Services - Total Force**
 - **Service Tactical Task List (TTL) Review**
 - **Component Mission Essential Task List (METL)**

FUNCTIONAL REQUIREMENTS PROCESS

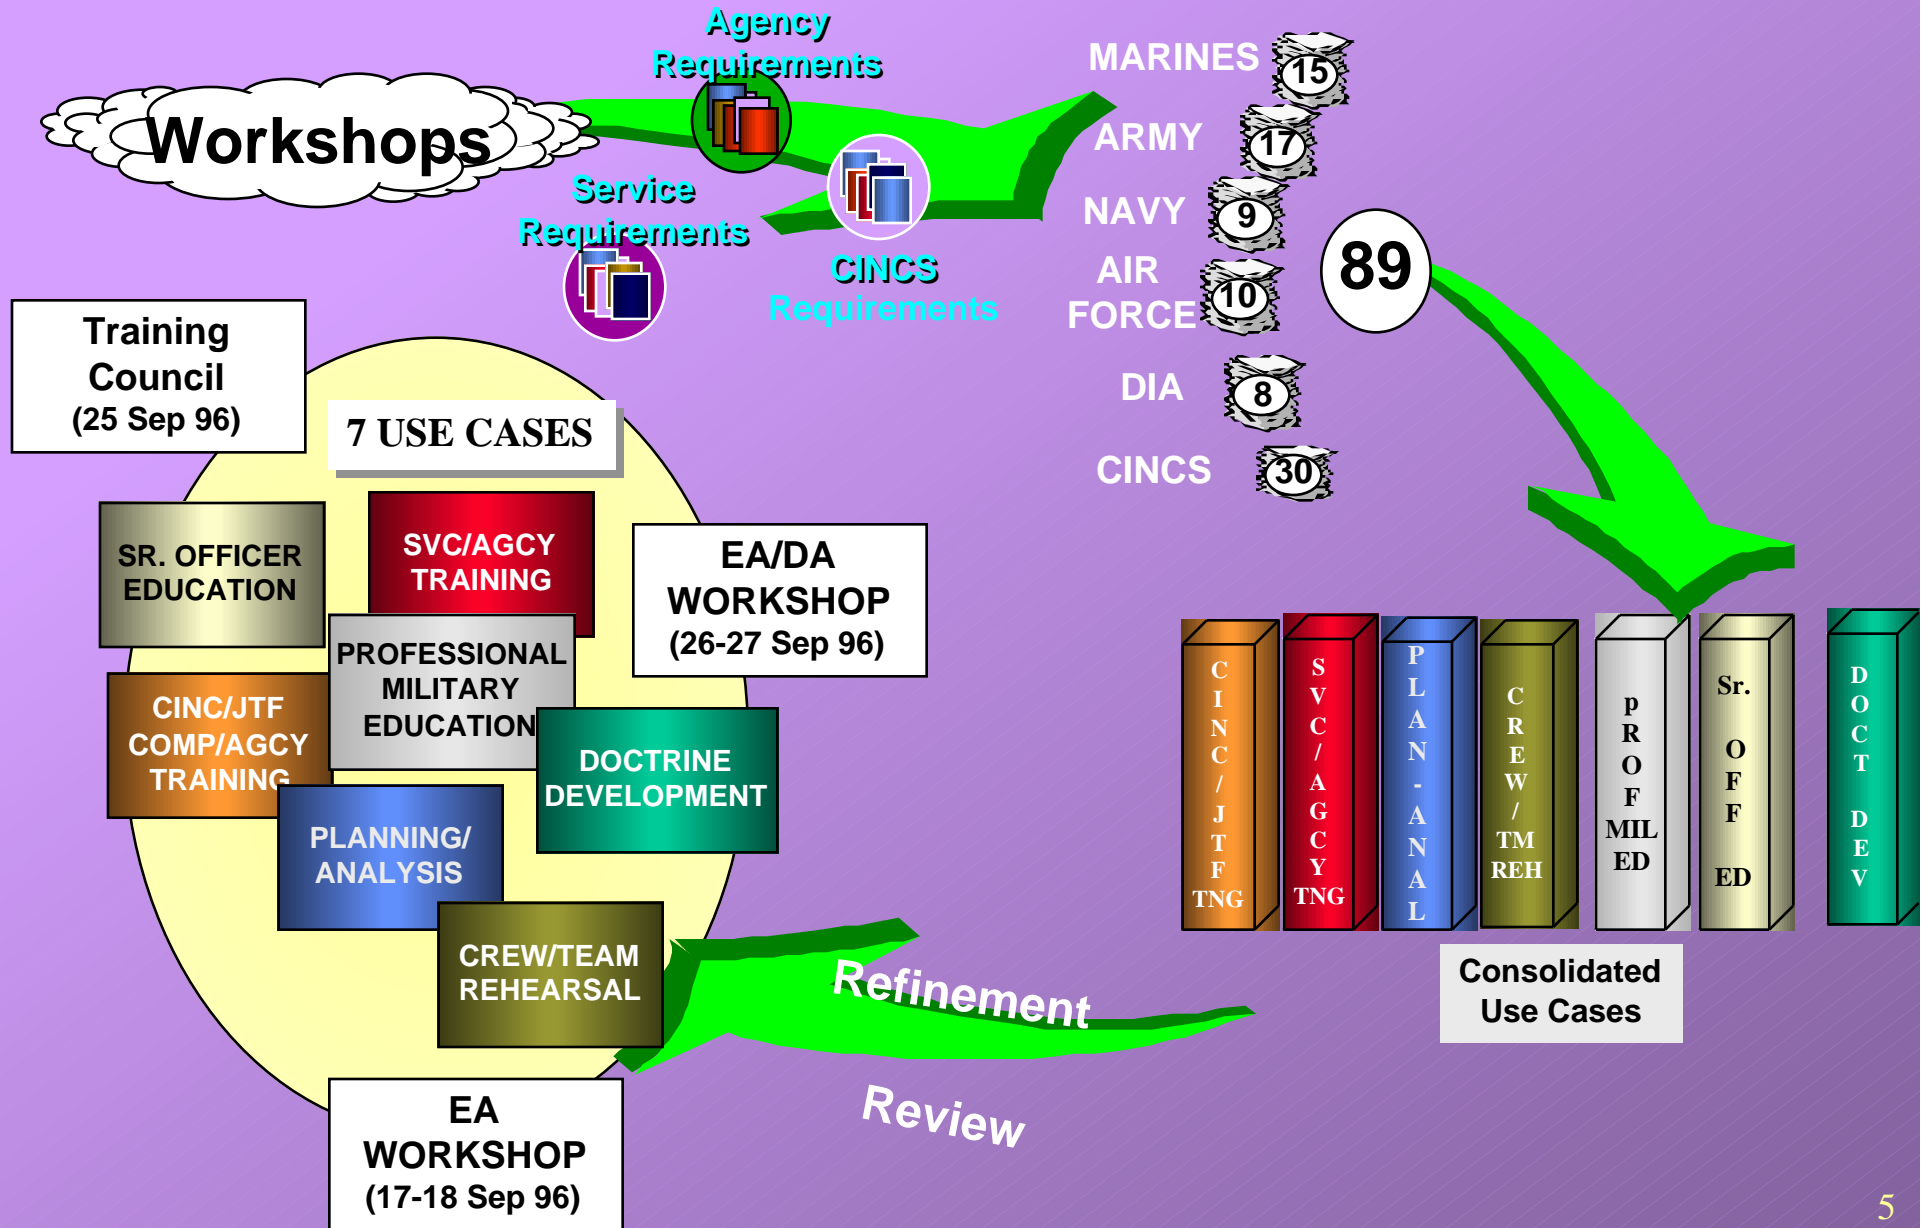

- **Supports JSIMS development process.**
 - Integrates CINC and Service requirements.
- **JSIMS Workshops**
 - Captured Service Requirements over the last three months.
 - Reviewed CINC Joint Training Plans for Training Needs.
 - Solicited CINC future needs from Joint Training Review Group Representatives.
- **Evolves into LONG TERM REQUIREMENTS**

Functional Requirements Process

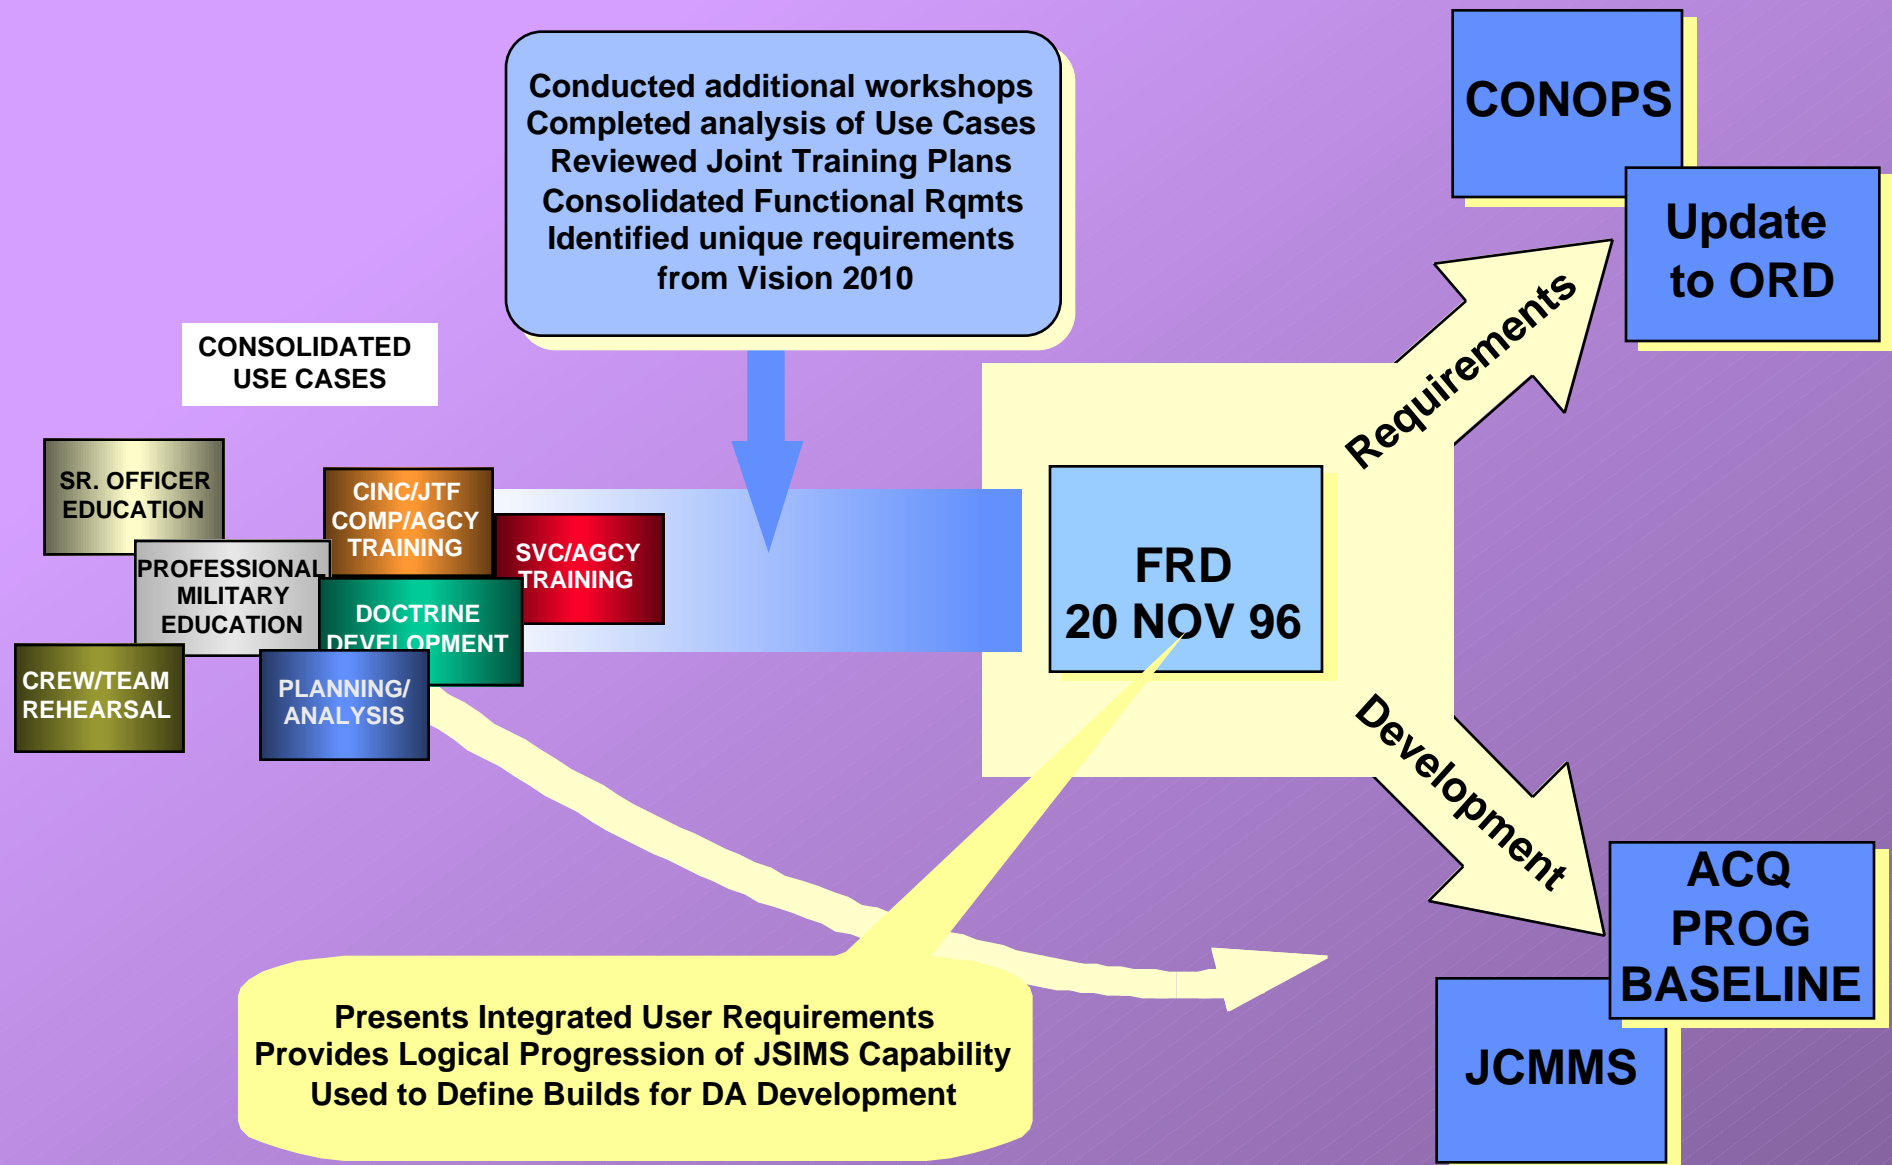

- Provides a user focus for the sequential development of JSIMS functional capabilities
- Helps drive the update to the Operational Requirements Document and Acquisition Program Baseline

Review of the Process

Status

Use Case Characteristics

Correlation With the Real-World

Level of Representation

Low

Required Fidelity

High

Conceptual in Nature
Notional Forces
Low Behavioral Complexity
Highly Aggregated World View

Next Steps

A Dynamic Process

WHY IS IOC BETTER THAN TODAY?

- **Portray Joint Operations at the Strategic Theater and Operational Levels of War**
 - **Combatant Command through Component Training**
 - **Includes Space, SOF, Logistics, Sustainment and Intel**
 - **Supports MOOTW (NEO, Dynamic ROE, multi-dimensional factions, changing allegiances)**
- **Automates Labor Intensive Tasks**
 - **Target processing, BDA, ATO, Intel collection & dissemination**
 - **Training audience feedback**
- **Incorporates a Joint After Action Review Process**

WHAT DOES FOC ADD?

- **Extends functionality to the Strategic National and Tactical Levels of War**
 - **Improved mission rehearsal capability**
 - **Impact of political, social, economic, and cultural factors; expands MOOTW representation**
 - **Incorporates mobilization issues**
- **Continued exercise resource reduction**
 - **“Automated” echelons above and below the targeted training audience**

JSIMS Wargaming Requirements

- **Create a Joint Synthetic Battlespace**
- **Incorporate full spectrum of military operations**
- **Incorporate social, economic and political factors**
- **Utilize User's C4I systems**
- **Distributed wargaming capability**
- **Scaleable capability to run a CINC or Service wargame with a minimum amount of equipment**
- **Linkage to JEMP III**
- **Tailorable Scenarios with real-world databases**

JSIMS Wargaming Requirements

- **Interface with Command GCCS compliant planning systems**
- **Support UJTL V 3.0 Civil, Physical and Military Conditions**
- **Support database development within 96 hours**
- **Time control capability (faster than real time 10:1 and slower than real time 1:10)**
- **Provide up to 54 simultaneous scenarios to support education users**
- **On-line queries to highlight user-defined critical events**

SUMMARY

- **A truly Joint effort--CINC and Service involvement up front to meet current and future training needs**
- **Replicates a wider range of the U.S. Armed Forces missions and includes other government agencies**
- **Cooperative program leveraging existing software efforts**
- **Multi-faceted--JSIMS will support training, education, military planning and mission rehearsal**
- **Incorporating User's Requirements--CINC/Component J/METL with Conditions, *Standards* and their specified Training Audiences**
